B Read this short text. Then fill in the sheet below.

Galileo was a scientist. One of his experiments is very famous. It was an investigation into the speed of falling objects. He believed that the heavier an object was, the quicker it would fall. In 1584 he climbed to the top of the Tower of Pisa, carrying two metal balls. One ball was heavier than the other. He dropped the two balls at the same time and both balls hit the ground together.
